## Partnerships for Economic Development

It is often said that economic development is a team sport. While much work is done at the regional and local levels, there are plenty of federal resources available to assist in the process. That is why it is important to forge alliances and collaborate with other agencies that can help.

The Louisiana Economic Development (LED) team works in partnership with stakeholders and local, regional and federal organizations to drive progress in rural communities across the state. In every initiative, we work to elevate and support community-led efforts to revitalize rural communities.

To support, LED has compiled a list of partners, allies and economic development organizations that have made the commitment to help build communities and businesses throughout Louisiana.

LED's Louisiana Community Network provides tools that empower communities to be ready for investment, jobs and economic growth. These resources will connect you with a wide range of partners and allies around the world, searchable by organization type. From funding partners to community foundations, government agencies to utility companies, this network is the perfect starting point for any economic development collaboration.
