Industrial Tax Exemption Program Application - (2024 Emergency Rules)

** Any changes made to the information provided after the initial submission of this Application, whether requested by the Company or by LED, may result in a delay in Application processing time and/or Board of Commerce & Industry consideration. **

Project ID: 20240376-ITE

Date Received: 9/5/2024

PROJECT INFORMATION

Company:	Exxon Mobil Corporation
Project Name:	ExxonMobil Product Solutions-BRA New Business Sustainability Suite - Advanced Recycling & Performance Semiconductor IPA
Project Location:	4045 Scenic Hwy , Baton Rouge, LA, 70805
Parish:	East Baton Rouge
City Limits?:	--

COMPANY INFORMATION

Product Manufactured:	The Baton Rouge Refinery produces refined Petroleum Products including manufacturing of Polypropylene, and the Baton Rouge Chemical Plant manufactures products like: Ethylene, propylene, EPDM rubber, isobutylene, isoprene, butadiene, butyl rubber, alcohols, higher olefins, neo acids, and lubricity additives.
Manufacturing Process/Activities:	The Baton Rouge ExxonMobil Refinery is the fifth largest refinery in the United States and processes more than 300 products and grades of products including: motor gasoline, diesel, jet fuel, aviation gasoline, petroleum coke, chemical feedstock, liquified petroleum gas, lubricating oils, and waxes for makeup, candles, crayons and chewing gum. Plastic waste feed is heated and converted to a fuel-gas mixture in an oxygen-deficient atmosphere and the mixture is converted to chemical monomers using a proprietary catalyst. This stream is then feed to the existing processing units of the Refinery and Chemical Plant. The carbon facilities take carbon created in the process of making synthetic gas and heats it to purify the carbon for use in battery components. In addition, the Baton Rouge Chemical Plant is a fully integrated modern petrochemical facility including packaging facilities supporting customers globally. The performance semiconductor IPA is produced via distillation towers for this grade.

GAMING

Has the applicant or any affiliates received, applied for, or considered applying for a license to conduct gaming activities? Yes No

If yes, please give a detailed explanation including the name of the entity receiving or applying for the license, the relationship to the business if an affiliate, the location and the type of gaming activities:

PROJECT DETAILS

NAICS:	324110
Project Type:	Addition
Project Start Date (beginning of construction and/or installation):	1/1/2025
Project End Date (ending of construction and/or installation):	6/30/2027
Anticipated date for the commencement of operations of this project:	6/30/2027
Project Description:	

For Advanced Recycling (AR): In response to several sustainability initiatives in the market, this project will install facilities at existing Baton Rouge Complex to allow processing of plastics not currently able to be mechanically recycled. The new equipment will include installation of truck unloading facilities to receive and store plastics, new control system to monitor quality of plastic feed, and processing equipment to breakdown used plastics to native materials for reprocessing into new light weight durable plastics. This equipment will include: truck unloading rack, 2 silos to store plastic feed, new instrumentation and control system to monitor flow and quality of plastic feed, two dust collectors (piping components), a mixing vessel, an analyzer, 4 pump skids, and 2 heat exchangers. Utilities include piping system for steam, natural gas, nitrogen, and water, and as-needed electrical/supply connections. To support supply of used plastics for processing, Tencate turf recycling is considering a new facility in Louisiana to collect turf plastic for ExxonMobil. This assessment is still under development. There are no new buildings for this investment as we will integrate the control systems (Instrument kits and Analyzers) into existing buildings. This investment will expand the equipment on operating units within the complex. We have included a small amount for "materials" allocated from the Labor and Engineering category for concrete/pad-site needed for the equipment expansion. The new Advance Recycling facilities will require the retention of current employees at the site. For Performance Semiconductor IPA(PSI): In response to federal CHIPS Act, several microchip producers are building facilities in the US. To support these new operations, project installs facilities to purify IPA 99 product to meet SG-4+ product requirements (microchip processing chemical). Existing Baton Rouge isopropyl alcohol (IPA) asset is only able to produce SG-3 which is utilized in some semiconductor chip manufacturing process. As the complexity of chips has increased, so have the specifications. Target specifications for new IPA product will be 99.999 wt% (versus 99.991 wt%) purity and <2 wppm TBA. Existing facilities do not have the ability to distill to 99.999 wt% nor reach <2 wppm TBA. As a result, 2 additional distillation columns with auxiliary equipment (pumps, exchangers, accumulator, instrumentation, piping to provide additional material draw from towers "side draw") will be installed to produce this product and support US manufacturing of microchips. This project is very equipment heavy and will include 2 distillation towers in series to purify isopropyl alcohol from 99.99% purity to 99.9999% purity. The supporting equipment for these towers includes 5 reboiler heat exchangers, 4 condenser exchangers, 1 product cooler exchanger, 10 pumps, an accumulator, 3 drums, 1 in-line analyzer, 1 new laboratory bench analyzer and instrumentation to control this equipment. This investment will expand the equipment on operating units within the complex. There are no new buildings for this investment as we will integrate the control systems into existing buildings, however, we have included concrete under "materials" for new tower foundations, pump pads, exchanger footings.

Will any portion of this project become operational/usable prior to the overall project's completion (i.e. application filled in phases)? Yes No

ESTIMATED INVESTMENTS

Building & Materials:	\$6,755,810.00
Machinery & Equipment:	\$61,972,626.00
Labor & Engineering:	\$51,712,064.00
Estimated Total Investment Amount:	\$120,440,500.00
Less: Restricted Amount:	\$0.00
Total Estimated Investments:	\$120,440,500.00

PROPERTY TAX

Millage Rate for this property. Use the millage rate obtained from the parish assessor to calculate the fee. This is usually a whole number (i.e., 115.47 or 92.665. A millage rate is expressed in 1/1000ths of a dollar (known as one mill). Convert the whole number millage rate by dividing by 1000 to a decimal number (i.e., the whole numbers converted to 1/1000ths would be .1154 or .0927 when rounded to four digits.)

0.0959

Note: [Proof of Millage/Location form](#) must be completed by the parish assessor and uploaded to the attachments of this application.

Total Property Taxes paid (most recent year for this site): 17326532.00

Industrial Tax Exemption Program Application - (2024 Emergency Rules)

** Any changes made to the information provided after the initial submission of this Application, whether requested by the Company or by LED, may result in a delay in Application processing time and/or Board of Commerce & Industry consideration. **

Project ID: 20240355-ITE

Date Received: 8/29/2024

PROJECT INFORMATION

Company: Flopam Inc.
Project Name: Plaq 25-27
Project Location: 26790 LA Hwy. 405 , Plaquemine, LA, 70764
Parish: Iberville
City Limits?: --

COMPANY INFORMATION

Product Manufactured: Water Soluble Polymers
Manufacturing Process/Activities: Flopam Inc. is a manufacturer of water soluble polymers. The manufacturing process begins with mixing acrylonitrile with water to trigger a reaction creating the chemical acrylamide. The acrylamide is then converted into the water soluble polymers.

PROJECT INFORMATION

Company: Metal Fab Guys, L.L.C.
Project Name: Metal Fab Guys
Project Location: 9008 Comar Drive , Walker, LA, 70785
Parish: Livingston
City Limits?:

COMPANY INFORMATION

Product Manufactured: Laser cutting, Tube cutting, Laser welding, Sheet metal forming, Powder coating, Prototype design services, Short/Long run manufacturing, UV printing.
Manufacturing Process/Activities: Different types of metal are loaded onto a sheet laser via an automated loading machine and then goes through precision cutting for specific, detailed and custom designs before being unloaded and moved to a press brake that can bend and form sheet metal into complex shapes and structures with precision and intricacy. Components are cut on a laser tube machine and welded with an advanced laser welding technology that produces minimal heat distortion. This laser can also be used to remove rust and provide a clean surface for further processing as needed. Some products required surface finishing through a powder coating booth and oven. The product will then be cured and finished with surface treatments. If desired, a UV printer can also print vibrant high resolution graphics that can be affixed and sealed to a product as desired by customer orders.

Project Description:

Metal Fab Guys, L.L.C. is constructing and building out space at the leased facility including procurement, logistics, and CAD design offices. The company is investing in advanced machinery with automation including generator, hoppers, forklift, laser machines, press breaks, and welding equipment. These additions enable us to provide high-precision laser cutting, tube processing, welding, surface finishing, and UV printing services. The purpose of these investments is to elevate production efficiency and ensure superior quality in all our products. These enhancements benefit our facility by increasing capacity, reducing lead times, and allowing us to meet a broader range of customer requirements with unparalleled precision and consistency.

CONTRACT SIGNATORY

The contract signatory will be used when signing contracts. The contracts will be signed online and will take place after the board approves a form.

Title: Owner/Manager

First Name: Richard

Last Name: Stewart

Email Address: richard@metalfabguys.com

CERTIFICATION STATEMENT

I hereby certify that this project meets all Constitutional, statutory and regulatory provisions applicable to this program. I hereby certify that the information provided in this document and additional materials is true and correct and that I am aware that my submission of any false information or omission of any pertinent information resulting in the false representation of a material fact may subject me to civil and/or criminal penalties for filing false public records (R.S. 14:133) and/or forfeiture of any tax benefits approved under this program. I understand that the application and information submitted shall not be returnable to the applicant.

FORM SIGNATURE

I, **Jamie Parsons**, approve the above information.

A handwritten signature in blue ink, appearing to read 'J. Parsons', is written across the signature line.
