1 1 it's the Legacy Chemical Plant that we have. out migration, particularly among our 2 2 On April 9th, Mid South Extrusions, which well-educated with over 40 percent of the 3 3 people leaving having a Bachelor's degree or is a family-owned flexible film and bag 4 manufacturing company, announced its 12 and a 4 higher. We really needed to address this. 5 5 half million dollar expansion into their And then our GDP per capita has declined 6 6 production capacity with the addition of two over the past 15 years. The jobs and 7 new state of the art polyethylene extrusion 7 population have grown very slowly. So we 8 8 identified our pillars of prosperity in the lines. And it will create 12 jobs. This is 9 9 the second expansion that the company has strategic plan being the ease of doing 10 announced. They announced an expansion in 10 business, our high wage employment, our 11 11 thriving regions, growth and innovation, and September of last year. 12 Also, we've been working, as you know, on 12 our global impact. And the priority sectors 13 13 our strategic plan that we've been working on that we derived from this strategic plan are 14 since we passed our legendary restructuring 14 energy and process industries, warehousing and 15 Bill of LED that Senator Mizell had last year. 15 logistics, agribusiness, aerospace and defense, professional services, technology, 16 And we've been working with our Louisiana 16 17 Economic Development Partner Advisory Board, 17 and life sciences. 18 and they met and approved LED's strategic plan 18 The two foundational priority 19 in late March. And that's a comprehensive 19 initiatives, which will underpin in support of 20 20 statewide strategic plan. We have not had one the execution of our plan, is the Governor's 21 21 whole of government economic strike force, a in over 16 years. And it was really outdated 22 22 during the diagnostic review to gain an formalized collaboration between cabinet level 23 23 outside in understanding of state agencies with members owning initiatives that 24 24 contribute to economic development. This was competitiveness. We had extensive stakeholder 25 engagement opportunities throughout the State. 25 very, very key in our successful win of the Page 48 1 1 We held eight regional workshops, 20 Meta project in December, as well as the 2 interviews with state departments and 2 Hyundai project. We really took a different 3 institutional leaders. 3 approach to economic development during the 4 We interviewed 50-plus elected officials 4 past 15, 16 months, and it truly has proven to 5 5 that were engaged in small group meetings that be successful. 6 we held across the state. And there were 250 6 So we're also going to launch a Louisiana 7 7 key stakeholder engagements occurred Opportunity Campaign, which is a holistic 8 8 throughout this process. So we really took it communication strategy targeting businesses 9 as an opportunity to engage with everyone as 9 and high potential talent to relocate to or to 10 we forged forward with our vision, which is to 10 remain in Louisiana. And so with all of that, 11 build the most revised innovative and growing 11 we've got our Bills that are in the 12 economy in the southeast that elevates all of 12 Legislature. And, Senator Mizell, thank you 13 Louisiana. 13 again for Senate Bill 161, which is what we're 14 So throughout the strategic plan process, 14 calling the Reorganization 2.0 which builds 15 we did recognize what our competitive 15 upon Act 590, which was known as positioning 16 positioning was in Louisiana, which is our 16 Louisiana to win. And the components of it 17 ongoing advantages and our asset sectors like 17 were to inform our best practices and promote 18 energy, manufacturing, and process industries, 18 government efficiency, while expanding upon 19 19 our leadership in STEM production, new recent statewide success. 20 business formation, and favorable cost of 20 So within that, we're going to have the 21 21 doing business. We're the U.S. leader in creation of the Louisiana Economic Development 22 22 exports and high specialization in venture Innovation Fund. And also, it's going to give 23 capital investments, and growth sectors, but 23 us the ability to purchase and sell land. And 24 we also recognized our key challenges that we 24 it has agencies streamlining it. Those are some of the key highlights from that. 25 needed to address, which was our high domestic 25 Page 47 Page 49

1 Our next Legislative action that we have 1 strategic plan. And it's going to ensure 2 2 is the creation of our High Impact Job program sustainability and growth through 3 Creation Program, which representative Emerson 3 public private partnerships. 4 is carrying that House Bill 507. And for 4 As you know, if you've seen what we've 5 5 almost 30 years, the State of Louisiana has had as our site, we've only had like one mega 6 incentivized job creation with the Quality 6 site that we've had within the State that was 7 Jobs Program. Since FY'16, the Program has 7 invested over 20 years ago. So this will 8 8 seen participation from companies creating allow us the ability to work with sites that 9 9 over 22,000 new jobs. we know that are out there, that we can have 10 What the program has not done has really 10 some improvements with, and leverage some 11 driven towards that high wage opportunity for 11 private investments as well. 12 our residents. And to remain competitive and 12 We also have a couple other Bills, Senate 13 provide a pathway of ever-growing wages, LED 13 Bill 232 with Senator Bass, which is our 14 has developed this High Impact Job creation 14 Motion Picture Production Incentive Program. 15 Program. The Program provides a reimbursable 15 And then we also have the Major Events 16 grant to a company based on new jobs created 16 Incentive Program that was brought back to 17 that pay above the parish average wage in the 17 LED. We're making some improvements on that 18 parish that the project is located. New jobs 18 one, and Senator Harris is carrying that. 19 paying 125 percent of the parish average 19 So there's lots that has been going on 20 20 receive an 18 percent grant. New jobs paying since we last met and we hope to have a lot 21 above 150 percent of the parish average 21 more to report out positively in June when we 22 22 receives a 22 percent grant. meet again. And then for those of you, I'm 23 23 The Program will also provide for a lower going to probably embarrass Christina Smith, 24 threshold of eligibility in most distressed 24 but she's our new Executive Director of 25 parishes. New jobs paying 110 percent of the 25 Operations for LED. And with the Bill that Page 50 Page 52 1 parish average wage in the distressed region 1 was done last year, there was positions that 2 will be eligible for an 8 percent benefit. 2 were eliminated that were appointed positions, 3 The Program's Rule will define what is 3 and so Christina is kind of filling this new 4 distressed. But based on some of the other 4 position that we have at LED as we restructure 5 5 States's models that we've seen, it may be internally, continue to restructure 6 defined as the bottom 25 percent of weekly 6 internally, we have created this position. 7 7 wages as an example. And this position is responsible for our 8 8 And then, Representative Deshotel, thank program administration, as well as our 9 you. House Bill 433 is the LED site 9 compliance and reporting. So each of you will 10 development. This proposed Legislation 10 get to know Christina, I'm sure, throughout 11 establishes a site investment in 11 your interactions with LED. 12 12 infrastructure fund, improvement fund that I do want to take one privilege though to 13 will receive an initial deposit, hopefully, of 13 really appreciate and send a thanks. There's 14 \$150 million from the State General Fund. And 14 a lot that goes into supporting the systems 15 each subsequent year, the Fund will receive 15 that support the programs that come in front 16 10 percent of State recurring General Fund 16 of the Board. Yeoman's work was done with our 17 Revenue not exceeding \$50 million, as 17 program administrators of ITEP and our IT team 18 recognized by the Revenue Estimating 18 at LED the past six months trying to get 19 19 Conference. everything ready with our emergency rules that 20 So the principles of this program is to 20 our legal team also assisted greatly on and 21 leverage funding to build upon existing assets 21 putting all that in place, so that when the 22 22 with regional impact, to increase existing rules became effective, we can just turn on 23 inventory of market ready sites, to invest in 23 the switch so to speak and the system was 24 sites that support demonstrated market demand 24 there to support the companies and their interactions with the Department. So I just 25 aligned with priority sectors within the LED 25 Page 51 Page 53
