Industrial Tax Exemption Program Application - (2024 Emergency Rules)

** Any changes made to the information provided after the initial submission of this Application, whether requested by the Company or by LED, may result in a delay in Application processing time and/or Board of Commerce & Industry consideration. **

Project ID: 20250096-ITE

Date Received: 3/19/2025

PROJECT INFORMATION

Company: Blu Morpho, LLC
Project Name: Ponchatoula
Project Location: 42742 Merchant Ct. , Ponchatoula, LA, 70454
Parish: Tangipahoa
City Limits?: --

COMPANY INFORMATION

Product Manufactured: Blu Morpho, LLC is a beverage manufacturer. We will be offering three beverage brands: Butterfly Girl Kombucha (non-alcoholic kombucha); Metamorphosis (THC beverage); and Blu Morpho (alcohol beverage).
Manufacturing Process/Activities: Using several large 20-barrel kettles, we will be brewing our various beverage products. We will then be canning the product and storing it in our cooler until it is shipped out directly to our customers or to retail establishments.

GAMING

Has the applicant or any affiliates received, applied for, or considered applying for a license to conduct gaming activities? ☐ Yes ☒ No

If yes, please give a detailed explanation including the name of the entity receiving or applying for the license, the relationship to the business if an affiliate, the location and the type of gaming activities:

PROJECT DETAILS

NAICS: 312111
Project Type: Start-Up/New
Project Start Date (beginning of construction and/or installation): 4/15/2025
Project End Date (ending of construction and/or installation): 12/31/2025
Anticipated date for the commencement of operations of this project: 12/31/2025
Project Description:

Blu Morpho, LLC. will be brewing and canning our beverages for sale at various retail establishments (such as grocery stores) and on-line. We will be purchasing all the equipment needed to manufacture, can, and package our products for sale and distribution, including large kettles and vessels, canning line, packaging equipment, refrigeration equipment, and forklift. ***Please note, Blu Morpho, LLC does not have a LWC ID yet as no employees have been hired at this time.

Will any portion of this project become operational/usable prior to the overall project's completion (i.e. application filled in phases)? ☐ Yes ☒ No

PROJECT INFORMATION

Company: Coca-Cola Bottling Company United Gulf Coast, LLC
Project Name: 2024 Project
Project Location: 5601 Citrus Blvd , Harahan, LA, 70123
Parish: Jefferson
City Limits?: --

COMPANY INFORMATION

Product Manufactured: This facility produces a diversified portfolio of sparkling beverages, waters, teas, sports drinks and energy drinks. The drink options also come in a variety of portion sizes and packages.

Manufacturing Process/Activities: This facility has multiple hot and cold fill lines to produce a diversified portfolio of sparkling beverages, waters, teas, sports drinks and energy drinks. Empty containers of various sizes and packaging are run through the fill lines to bottle the applicable liquid. After the product is bottled and sealed it is then packaged in various sized packaging, according to customer demand, then prepared for shipping / delivery.

GAMING

Has the applicant or any affiliates received, applied for, or considered applying for a license to conduct gaming activities? ☐ Yes ☒ No

PROJECT DETAILS

NAICS: 312111
Project Type: Addition
Project Start Date (beginning of construction and/or installation): 3/29/2024
Project End Date (ending of construction and/or installation): 12/31/2024
Anticipated date for the commencement of operations of this project: 12/31/2024
Project Description:

The company is expanding this facility's storage and warehousing capabilities, to allow for the production of more products onsite. The additional space will also allow for a new water treatment system used to filter water used in the beverage making process. The project consists of the construction of 13,800/sqft of additional building space to house a new automated Automatic Storage and Retrieval System (ASRS), that works like a Crane. An automated crane picks up pallets from a loading point in the warehouse and places the pallets in the racking system. This project will also require the purchase of 5 new forklifts, additional warehouse racking, and other lifts for moving pallets. A portion of this project was placed in service during 2024, with the remainder anticipated to be completed in 2025. The assets completed and capitalized in 2024 include the PS2 Water treatment system, new packer machine that is part of the ASRS system, 3 new forklifts, and new printer as part of the storage system housed in the new building.

Will any portion of this project become operational/usable prior to the overall project's completion (i.e. application filled in phases)? ☒ Yes ☐ No

PROJECT INFORMATION

Company: Hood Container of Louisiana, LLC
Project Name: 2024 Additions
Project Location: 2105 LA Highway 964 South , St. Francisville, LA, 70775
Parish: West Feliciana
City Limits?: --

COMPANY INFORMATION

Product Manufactured: Hood Container specializes in the manufacturing of containerboard, linerboard for box packaging, kraft paper, corrugated boxes, high graphic displays, and contract packaging by processing wood chips, pulp and other chemicals. Hood Container is also involved in the manufacturing and distribution of forest and wood products, building and construction materials, and flexible corrugated packaging products throughout North America.

Manufacturing Process/Activities: Hood Container converts wood into chips and then cooks the wood chips along with pulp and other chemicals. This is achieved by the following process: after pulping is complete, the fibers are sent directly to the paper machines where the product is formed, pressed, cut, folded, glued and dried and printed. This process creates containerboard, linerboard, kraft paper, corrugated boxes, high graphic displays and contract packaging.

GAMING

Has the applicant or any affiliates received, applied for, or considered applying for a license to conduct gaming activities? ☐ Yes ☒ No

If yes, please give a detailed explanation including the name of the entity receiving or applying for the license, the relationship to the business if an affiliate, the location and the type of gaming activities:

PROJECT DETAILS

NAICS: 322121
Project Type: Addition
Project Start Date (beginning of construction and/or installation): 4/2/2024
Project End Date (ending of construction and/or installation): 12/31/2024
Anticipated date for the commencement of operations of this project: 12/31/2024
Project Description:

Installation of a new Centrifugal Separator to boost evaporator efficiency, minimizing feed loss. Procurement of (2) 8,700-gallon double wall acid tanks, piping, and pumps for the #1 paper machine. Acquisition of (4) automatic stretches and load cells for the #1 paper machine, enhancing tension control. Installation of a spill collection tank to augment storage for pulping liquor leaks or spills. Purchase of a new scanner system for continued QCS system compatibility on #2 Paper Machine. Upgrade of power distribution transformer feeder (T2) cables for key areas including the South Steam Plant and Maintenance Shop. Purchase and installation of essential components for kiln shell to minimize unscheduled downtime. Installation of new Helical Piles and Structural Jacking Bents to support the Mill Effluent Piping Structure. Upgrade of Continuous Emission Monitoring (CEMS) and Opacity Monitoring Systems (COMS) to mitigate environmental risks. These advancements signify a commitment to cutting-edge technology, extending the mill's lifespan, and preserving local employment opportunities in Louisiana.

Will any portion of this project become operational/usable prior to the overall project's completion (i.e. application filled in phases)? ☐ Yes ☒ No

PROJECT INFORMATION	
Company:	Indorama Ventures Olefins LLC
Project Name:	2025 Project
Project Location:	4300 Hwy 108 , Westlake, LA, 70669
Parish:	Calcasieu
City Limits?:	--

COMPANY INFORMATION	
Product Manufactured:	Ethylene and Propylene
Manufacturing Process/Activities:	Indorama uses steam cracking to produce ethylene. This process involves heating hydrocarbons, like ethane or naphtha, in the presence of steam at high temperatures, breaking them down into smaller molecules, including ethylene. The resulting mixture is then cooled and purified to isolate the ethylene.

Project End Date (ending of construction and/or installation): 12/31/2024
Anticipated date for the commencement of operations of this project: 12/31/2024
Project Description:

Indorama Ventures Olefins is one of world's leading petrochemical manufactures with operations in 35 countries and 26,000 employees worldwide. The company is in process of expanding its facility in Westlake Louisiana. The overall project would consist of the purchase of additional equipment to improve operational process reliability and efficiency, and increase overall production capability. The major equipment categories planned the overall project would include A New Process Control and Safety System, Heat Resistance and Aeration Components for the Furnace and Boiler, A new Pumping and Fluid Handling System, Upgraded Metallurgy for the Piping System, Control Room HVAC, A Compressor Deck Crane, New Lab Equipment, A Decontamination Shower, and Permanent Access Platforms. During 2024 as part of this project, the company purchased and placed in service two pieces of lab equipment and a rotor and two valve racks as part of the Heat Resistance and Aeration Components for the Furnace and Boiler. The remaining project assets will be completed in 2025 and 2026.

Anticipated date for the commencement of operations of this project: 10/31/2025
Project Description:

The purpose of this project is to upgrade unit equipment to produce higher quality ultra-low sulfur diesel (ULSD). An existing distillation column will be modified by expanding the distillation section and associated internal equipment, install new piping and instrumentation, and relevant structural upgrades. By increasing the size of the distillation column Marathon Petroleum is expected to produce approximately 1000 BPD additional ULSD.

Will any portion of this project become operational/usable prior to the overall project's completion (i.e. application filled in phases)? ☐ Yes ☒ No

PROJECT INFORMATION

Company: Marathon Petroleum Company LP
Project Name: U12 Platformer Heaters CETEK Coating
Project Location: 155 Sugarcane Road , Garyville, LA, 70051
Parish: St. John the Baptist
City Limits?: --

COMPANY INFORMATION

Product Manufactured: Refined Petroleum Products
Manufacturing Process/Activities: Marathon Petroleum Company LP is engaged in petroleum products refining. The refining process involves the breakdown of crude oil into various components which are then manufactured into new petroleum products such as gasoline and diesel fuel.

PROJECT INFORMATION	
Company:	Noble Plastics, L.L.C.
Project Name:	Grand Coteau
Project Location:	318 Burleigh Lane , Grand Coteau, LA, 70541
Parish:	St. Landry
City Limits?:	<input checked="" type="checkbox"/>

COMPANY INFORMATION	
Product Manufactured:	Noble Plastics operates as a custom injection molder. This means that our revenue is derived from manufacturing the parts needed by our customers for their own products. We generally support components for Industrial Machinery like fasteners, torque couplings, seal housings, brackets, rods, and spindles. Our next largest customer base is military ordnance programs where the products we mold are generally safety devices to isolate explosives from the fuzing and metal components to safeguard against premature detonation, or modular composite components for lightweighting by replacing metal components with plastics. The remainder of our customer base is an assortment of inventors in the consumer goods, sporting goods, and veterinarian markets.
Manufacturing Process/Activities:	Injection molding is a process that takes thermoplastics in pellet form, subjects the pellets to heat and pressure to melt them, injecting them into closed molds, cool the molds, and eject the parts. Some resins need pre-processing through a dryer system and/or blender system. The process also requires water temperature controllers to cool the molds, or oil temperature controllers to heat the molds. All of our manufacturing cells are equipped with industrial robotics for part handling consistency, inspection, and trimming. Following molding, we often provide services for further assembly, kitting, and inspections.

PROJECT INFORMATION	
Company:	Packaging Corporation of America
Project Name:	Computer System
Project Location:	4200 Hwy 190W , DeRidder, LA, 70634
Parish:	Beauregard
City Limits?:	--

COMPANY INFORMATION	
Product Manufactured:	Paper and related products
Manufacturing Process/Activities:	<p>The manufacturing of Kraft paper uses two processes: the conversion of pine logs and the conversion of recycled paper. The manufacturing of Kraft paper begins with the conversion of pine logs into chips. These chips are then converted into pulp through the Kraft Pulp mill. Purchased chips are also converted into pulp through the same process. The pulp is then refined in a series of washing and screening operations before being sent to the machine. The manufacturing of recycled paper begins with the conversion of OCC (Old Corrugated Cardboard) and/or DLK (Double Line Kraft) into pulp. The pulp is then refined in a series of washing and screening operations before being sent to the machine. As the pulp reaches the wet end of the paper machines, it is a mixture of less than 1% fiber and over 99% water. As it enters the paper machines, it is delivered from the headbox at high rates of speed, onto a very fine mesh fabric with the water being drained from the swiftly moving fibers. When the sheet leaves the forming fabric, it moves between the press rolls and then on to the dryers to remove additional moisture. It then proceeds to the calendar stacks where final smoothing of the web is performed. As the web of paper exits the calendar stack, it is wound on a reel and then on a winder. Next, a slitter cuts the rolls into various widths to be shipped as ordered by the customer.</p>

GAMING

Has the applicant or any affiliates received, applied for, or considered applying for a license to conduct gaming activities? ☐ Yes ☒ No

If yes, please give a detailed explanation including the name of the entity receiving or applying for the license, the relationship to the business if an affiliate, the location and the type of gaming activities:

PROJECT DETAILS

NAICS: 322130
Project Type: Addition
Project Start Date (beginning of construction and/or installation): 10/4/2024
Project End Date (ending of construction and/or installation): 12/31/2024
Anticipated date for the commencement of operations of this project: 12/31/2024
Project Description:

This project included additions to the computer system including Bailey Interface IET800s, Pulpmill Delta DCS V 15LTS, Window Server 2022 on Dell R740s, Lenovo M70q thin clients, Precipitator Manager OPC System, Powerhouse Delta V DCS 14LTS, and QCS System ABB QCS 800xA 6.1.1. The benefit for this project is enhanced quality control through up-to-date servers, hardware and software while meeting more robust cyber-security standards.

Will any portion of this project become operational/usable prior to the overall project's completion (i.e. application filled in phases)? ☐ Yes ☒ No

Project End Date (ending of construction and/or installation): 12/31/2024
Anticipated date for the commencement of operations of this project: 12/31/2024
Project Description:

This project included additions to the mill's No 1 and No 3 paper machines. The additions are tile chests, dryer pocket felt rolls, dryer cans, vacuum pump, turbulator bars, threading equipment, and buss bars. These additions will result in improved structural integrity to the chests, improved drying, decreased thread time, and reduced down time. Furthermore, there were additions to the No. 3 paper machine building of column beams, cross beams, and catwalk supports which will result in improved support structure.

Will any portion of this project become operational/usable prior to the overall project's completion (i.e. application filled in phases)? ☐ Yes ☒ No

PROJECT INFORMATION

Company: Plastipak Packaging, Inc.
Project Name: Plastipak Expansion
Project Location: 4101 Pardue Road , Pineville, LA, 71360
Parish: Rapides
City Limits?: --

COMPANY INFORMATION

Product Manufactured: Plastipak manufactures plastic containers at its Pineville, Louisiana facility.
Manufacturing Process/Activities: The manufacturing process begins with HDPE (High Density Polyethylene), PET (Polyethylene Terephthalate) and PCR (recycled materials) delivered to blow molding machinery through piping within the plant. The raw plastics are heated to very high temperatures in the blow molding machine which turns the raw material into a liquid. The liquid is forced into molds where it is shaped into plastic containers. The containers travel along conveyors where trimming, labeling, and quality control process are completed. After the products have passed all quality controls, they are taken to warehouses for shipment to customers.

GAMING

Has the applicant or any affiliates received, applied for, or considered applying for a license to conduct gaming activities? ☐ Yes ☒ No

If yes, please give a detailed explanation including the name of the entity receiving or applying for the license, the relationship to the business if an affiliate, the location and the type of gaming activities:

PROJECT DETAILS

NAICS: 326199
Project Type: Addition
Project Start Date (beginning of construction and/or installation): 8/22/2024
Project End Date (ending of construction and/or installation): 12/31/2026
Anticipated date for the commencement of operations of this project: 12/31/2026
Project Description:

Plastipak Packaging, Inc. plans to expand their existing warehouse (estimated additional 200,000 sqft) and construct a new warehouse (estimated 310,000 sqft) which will house products throughout the manufacturing process from raw materials to finished goods. The company also plans to add 6-10 production lines to their facility which will require new equipment such as conveyor systems, compression systems, molds, and labeling/printing systems. The company plans to upgrade all production lines to increase the Post-Consumer Resin (PCR) production capacity including new extrusion systems and resin handling/destruction systems.

Will any portion of this project become operational/usable prior to the overall project's completion (i.e. application filled in phases)? ☒ Yes ☐ No

PROJECT INFORMATION

Company: Shintech Louisiana, LLC
Project Name: Brine Well Development – Wilbert No. 8 & 9
Project Location: 60705 Highway 405 , White Castle, LA, 70778
Parish: Iberville
City Limits?: ☒

COMPANY INFORMATION

Product Manufactured: Sodium Chloride Solution (Brine) is the pre cursor to the final manufactured product. The final product is PVC Resin. The NAICS code is 325211. This NAICS code is not registered with LWC because Shintech does not have any employees (nor an UI#) for this facility.

Manufacturing Process/Activities: After caverns are drilled, water is injected into the caverns and mixes with the salt to create a brine solution. Pumps bring the brine to the surface where it can be treated and used in the chlor-alkali process. The Sodium Chloride Solution (Brine) is the pre cursor to the final manufactured product. The final product is PVC Resin. The NAICS code is 325211. This NAICS code is not registered with LWC because Shintech does not have any employees (nor an UI#) for this facility.

PROJECT DETAILS

NAICS: 332312
Project Type: Addition
Project Start Date (beginning of construction and/or installation): 9/5/2024
Project End Date (ending of construction and/or installation): 12/31/2024
Anticipated date for the commencement of operations of this project: 12/31/2024
Project Description:

Southland Steel Fabricators is one of the largest steel fabrication companies in the region with over 30 years of experience serving the energy and transportation industries through the production of utility poles, solar piles, and other steel products. The company is conducting a major expansion project at their Greensburg facility. The purpose of the project is to increase steel product production capacity by a minimum of 20%. To achieve this goal the company will construct an additional 100,000sqft of fabrication space consisting of: • One new 58,000 sqft standalone building for the staging and initial processing of the raw steel. • Additional 42,000 square feet of covered work space which will be used as additional production space. The new space will house new manufacturing machinery, equipment and operator work space. The new machinery will consist of equipment necessary for cutting and shaping raw steel including additional robotic welders (x4) with side conveyors, discharger, and secondary part handler robot, an automatic CNC drilling and sawing system with tool changer and clamping attachments, and an automatic gantry CNC drilling and thermal cutting system with bevel torch, tool changer, and precision laser. This "A Phase" Application entails the assets associated with the parent project description above that went into service in 2024. This consists of 1 of the 4 planned robotic welders.

Will any portion of this project become operational/usable prior to the overall project's completion (i.e. application filled in phases)? ☐ Yes ☒ No

CONTRACT SIGNATORY

The contract signatory will be used when signing contracts. The contracts will be signed online and will take place after the board approves a form.

Title: Chief Financial Officer

First Name: Dale

Last Name: Sexton

Email Address: dale.sexton@southlandsteel.com

CERTIFICATION STATEMENT

☒ I hereby certify that this project meets all Constitutional, statutory and regulatory provisions applicable to this program. I hereby certify that the information provided in this document and additional materials is true and correct and that I am aware that my submission of any false information or omission of any pertinent information resulting in the false representation of a material fact may subject me to civil and/or criminal penalties for filing false public records (R.S. 14:133) and/or forfeiture of any tax benefits approved under this program. I understand that the application and information submitted shall not be returnable to the applicant.

FORM SIGNATURE

I, **Christopher Dale Sexton**

, approve the above information.

A handwritten signature in blue ink, appearing to read 'Chris Sexton', is written across the line. The signature is stylized with large loops and a long horizontal stroke at the end.

Industrial Tax Exemption Program Application - (2024 Emergency Rules)

** Any changes made to the information provided after the initial submission of this Application, whether requested by the Company or by LED, may result in a delay in Application processing time and/or Board of Commerce & Industry consideration. **

Project ID: 20240087-ITE

Date Received: 4/29/2025

PROJECT INFORMATION

Company: Valero Refining-New Orleans, LLC
Project Name: St Charles Tankage Project
Project Location: 14902 River Road , Norco, LA, 70079
Parish: St. Charles
City Limits?: --

COMPANY INFORMATION

Product Manufactured: The refinery produces gasoline, diesel, propane, jet fuel, petroleum coke and other products.
Manufacturing Process/Activities: This facility refines 340,000 barrels a day of crude oil and other feedstocks into gasoline, diesel, jet fuel, propane and a variety of other petroleum products through traditional processes.

GAMING

Has the applicant or any affiliates received, applied for, or considered applying for a license to conduct gaming activities? ☐ Yes ☒ No
If yes, please give a detailed explanation including the name of the entity receiving or applying for the license, the relationship to the business if an affiliate, the location and the type of gaming activities:

PROJECT DETAILS

NAICS: 324110
Project Type: Addition
Project Start Date (beginning of construction and/or installation): 4/1/2024
Project End Date (ending of construction and/or installation): 6/30/2025
Anticipated date for the commencement of operations of this project: 6/30/2025
Project Description:

The Project will construct two new 150 MBBL working capacity gasoline storage tanks within the existing tank dike area. The two tanks of this size will allow flexibility to produce smaller gasoline blends to meet customer demands. This flexibility will also permit the refinery to increase export sales by leveraging the refinery's high octane blendstock length, which favors certain export grades.

Will any portion of this project become operational/usable prior to the overall project's completion (i.e. application filled in phases)? ☐ Yes ☒ No

Calendar Years:

ESTIMATED INVESTMENTS

Building & Materials:	\$0.00
Machinery & Equipment:	\$13,100,000.00
Labor & Engineering:	\$2,850,000.00
Estimated Total Investment Amount:	\$15,950,000.00
Less: Restricted Amount:	\$0
Total Estimated Investments:	\$15,950,000.00

PROPERTY TAX

Millage Rate for this property. Use the millage rate obtained from the parish assessor to calculate the fee. This is usually a whole number (i.e., 115.47 or 92.665. A millage rate is expressed in 1/1000ths of a dollar (known as one mill). Convert the whole number millage rate by dividing by 1000 to a decimal number (i.e., the whole numbers converted to 1/1000ths would be .1154 or .0927 when rounded to four digits.) 0.1024

Note: [Proof of Millage/Location form](#) must be completed by the parish assessor and uploaded to the attachments of this application.

Total Property Taxes paid (most recent year for this site): 35172408.00
