

**MEGA-PROJECT DEVELOPMENT FUND
AND
RAPID RESPONSE FUND
SEMI-ANNUAL PERFORMANCE REPORT
APRIL 2024 TO SEPTEMBER 2024**

This report was prepared by Louisiana Economic Development to summarize the performance status of all active Mega-Project Development Fund and Rapid Response Fund incentive contracts. For each active contract, this report provides: project description; description of incentive funds provided; summary of performance requirements (minimum required payroll, capital investment, etc.); project status, including actual performance relative to requirements; and, where applicable, a summary of reimbursement obligations associated with any underperformance.

IMPORTANT NOTE: This report includes only business development projects with active Mega-Project Development Fund and Rapid Response Fund contracts. Because most LED-supported projects do not involve Mega-Project Development Fund or Rapid Response Fund incentives, the job and capital investment numbers included in this report represent only a portion of the totals for business development projects secured by LED.

MEGA-PROJECT DEVELOPMENT FUND

MEGA-PROJECT DEVELOPMENT FUND EXPENDITURE REPORT

Reporting Period – 04/01/24 to 09/30/24

Private Sector Mega-Fund Projects

Company	Total MPDF Funding Encumbered as of 09/30/24	Expenditures (Prior Cumulative and Current Reporting Period \$)			Job Commitments ¹			Average Salary ² (\$ per year)	New indirect jobs ³	Total new jobs (direct and indirect)	Capex (\$MM)	New annual state tax revenues (\$MM/year) ⁴
		Prior Cumulative	Current Period 04/01/24-09/30/24	Total	Retained	New	Total					
Benteler	20,000,000	20,000,000	-	20,000,000	-	675	675	50,000	1,540	2,215	900.0	8.6
ConAgra Foods	32,400,000	32,400,000	-	32,400,000	-	500	500	35,000	1,420	1,920	211.0	4.2
IBM-Baton Rouge	23,000,000	23,000,000	-	23,000,000	-	800	800	n/a	542	1,342	-	4.7
SNF Holding Company	26,550,000	26,550,000	-	26,550,000	-	512	512	57,400	900	1,412	350.0	6.7
Act 15 of 2014 ⁵	23,800,004	23,250,004	550,000	23,800,004	-	-	-	-	-	-	-	-
Act 16 of 2015 ⁵	13,886,071	13,886,071	-	13,886,071	-	-	-	-	-	-	-	-
Total	139,636,075	139,086,075	550,000	139,636,075	-	2,487	2,487	-	4,402	6,889	1,461	24.2

¹ Includes full time and full time equivalent positions.

² Average salary for new positions only; excludes benefits.

³ Estimates for indirect jobs based on standard RIMS multipliers from the U.S. Bureau of Labor Statistics (BLS).

⁴ Includes direct and indirect taxes generated by each project after completion (full employment); includes only impact of new project/employment (i.e., impact of any existing operations not included).

⁵ During the legislative process, a means of financing substitution from General Fund to MPDF was enacted to pay for existing project commitments, which do not necessarily meet the criteria of a "Mega" project. The current period expenditures reflect payments for various project commitments.

IMPORTANT NOTE:

1. Above list of projects includes only those for which the MPDF was utilized – LED has secured many other project wins for which the MPDF was not utilized.
2. Announced projects without a fully executed CEA are not included in this report.

PRIVATE SECTOR MEGA-FUND PROJECTS

BENTELER STEEL/TUBE MANUFACTURING CORP.

Seamless steel tube and steel production facility

Project announced in 2012

Caddo Parish

Benteler Steel/Tube Manufacturing Corporation (Benteler) committed to build a seamless steel tube mill and a steel mill in Caddo Parish, Louisiana creating 675 new direct jobs with average salaries of \$50,000, plus benefits, by 2022.

Benteler considered building this new project in a dozen other states, but chose Louisiana because the State is located in the heart of America's energy corridor, has one of the best business climates in the country, has a world-class transportation infrastructure, and possesses the best workers in the world.

To secure the project, LED offered Benteler a performance-based grant of up to \$33.5 million for infrastructure construction, site preparation, training center construction and workforce development. Grant funds are to be provided on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, \$33.5 million in expenditures had been reimbursed by the State to Benteler Steel, Bossier Parish Community College, and Caddo-Bossier Port Commission.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and Benteler commits the company to spend not less than \$892 million in capital expenditures by June 30, 2024.

The company has committed to produce 675 total new direct jobs according to the following schedule: 271 new direct jobs by December 31, 2016; an additional 134 new direct jobs by December 31, 2018; an additional 135 new direct jobs by December 31, 2020; and an additional 135 new direct jobs by December 31, 2022.

The CEA includes clawback provisions that require Benteler to reimburse the State, with interest, proportionate to any nonperformance against critical commitments in the CEA (principally capital expenditures and payroll obligations). Specifically, the company must reimburse the State a one-time amount equal to 1.5 percent of any shortfall relative to capital expenditures and 18.32 percent of any shortfall relative to required payroll obligations. Lastly, the company shall reimburse the State 100 percent of the State's investment in the Training Center if the company fails to timely commence operations.

As of the report date, Benteler's on-site construction of the steel tube facility was complete. Under the CEA, the company's performance is assessed annually relative to payroll obligations. The most recent obligation included \$36.2 million in payroll for the 12-month period ending December 31, 2023. Benteler generated \$27.1 million in new payroll during this period. The company met the 2023 performance requirement by coupling \$27.1 million in payroll with previously earned payroll credits. Benteler earned these payroll credits by exceeding performance requirements in previous years. The next obligation includes \$36.5 million in payroll for the 12-month period ending December 31, 2024.

As of the report date, Benteler was meeting or exceeding all current performance requirements in the CEA.

CONAGRA FOODS LAMB WESTON

Large-scale sweet potato processing facility

Project announced in 2009

Richland Parish

ConAgra Foods Lamb Weston (ConAgra) committed to construct a large-scale sweet potato processing facility, including capital investment of \$211-256 million and employment ramping up to 500-600 with average salaries of about \$35,000, plus benefits, by 2015.

Upon completion, the ConAgra facility is expected to become the largest private-sector employer in Richland Parish, as well as one of the 10 largest private-sector employers in Northeast Louisiana. The new facility also will become one of Louisiana's top 100 economic-driver firms (out of roughly 120,000 total current employers) based on direct and indirect job impact.

To secure the project, LED offered a performance-based grant of up to \$37.4 million from the Mega-Project Development Fund to be utilized for land, buildings, structural improvements and land improvements, and then machinery and equipment (in that order). Grant funds are provided on a reimbursement basis after company expenditures are verified and approved by the State. As of the report date, \$32.4 million in expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and ConAgra specifies a two-phase development plan for the project, starting with Phase I of construction (at least \$156 million) to be completed by June 30, 2011 and Phase II (an additional \$55 million) by January 1, 2014.

Phase I will result in 275 new direct jobs by December 31, 2011 while Phase II will result in an additional 225-325 new direct jobs by December 31, 2015; therefore, the company has committed to produce 500-600 total new direct jobs.

The CEA includes clawback provisions that will require ConAgra to reimburse the State, with interest, proportionate to any nonperformance against critical commitments in the CEA (principally capital investment and payroll obligations). Specifically, the company must reimburse 2.5 percent of any shortfall relative to capital investment commitments, and 16.5 percent of any shortfall relative to payroll obligations.

Phase I of the facility officially opened in mid-September of 2010 and construction on Phase I has been completed. The company's investment in Phase II of operations has been completed.

Phase II of the operation was required to produce at least \$20.6 million in new payroll for the 12-month period ending December 31, 2023. ConAgra generated \$20.5 million in new payroll during this period, missing the performance requirement. ConAgra's next obligation includes \$21.0 million in new payroll for the 12-month period ending December 31, 2024.

As of the report date, ConAgra was meeting about 99 percent of the payroll obligation specified in the CEA. During the reporting period, LED received payment for the clawback resulting from the company's underperformance in Project Year 2023.

IBM

Technology center

Project announced in 2013

East Baton Rouge Parish

IBM committed to establish a technology center in Baton Rouge, Louisiana creating 800 new jobs by 2017.

IBM's decision to locate in Baton Rouge will have a transformational impact on Baton Rouge and Louisiana. The technology center will employ a broad range of college graduates and experienced professionals with backgrounds in computer science and other quantitative-intense fields, such as, engineering, mathematics, and science.

The IBM project includes innovative, public-private partnerships to expand higher-education programs related to computer science and to construct a major new riverfront development that will accelerate the revitalization of downtown Baton Rouge. For the IBM project, the State will provide \$14 million over 10 years to expand higher education programs designed primarily to increase the number of annual computer science graduates. At least 65 percent of those funds will be provided for expansion of the Computer Science Division of the School of Electrical Engineering and Computer Science at LSU. Another public-private partnership secured construction of the IBM center's permanent site, an approximately \$30.5 million office building that will be owned by the Wilbur Marvin Foundation, an affiliate of the Baton Rouge Area Foundation (BRAAF). The office building will be constructed with public funds and leased to IBM for a nominal rate for the life of the incentive contract, whereas BRAAF's real-estate development arm (Commercial Properties Realty Trust) will secure private financing for the residential building that will be completed in 2016. LED offered IBM a performance-based incentive package that includes grants totaling \$29.5 million over 12 years, including a \$1.5 million contribution from the city of Baton Rouge/Parish of East Baton Rouge, to reimburse costs related to personnel recruitment, relocation, and other workforce-related costs; internal training; and facility operating expenses. As of the report date, \$23.0 million in expenditures had been reimbursed by the State towards the project.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED, The Wilbur Marvin Foundation, city of Baton Rouge/Parish of East Baton Rouge, and IBM commits the company to establish a temporary facility and commence operations by July 1, 2013.

The company has committed to produce 800 total jobs according to the following schedule: 100 by June 30, 2014; an additional 200 by June 30, 2015; an additional 200 by June 30, 2016; and an additional 300 by June 30, 2017.

The CEA includes clawback provisions that require IBM to reimburse the State, with interest, proportionate to any nonperformance against critical commitments in the CEA (principally jobs). Specifically, the company must reimburse \$6,495 multiplied by any shortfall in jobs each year.

As of the report date, IBM had commenced operations in its permanent facility. The most recent obligation of IBM was to produce 800 jobs for the 12-month period ending June 30, 2024. The company generated 1,114 jobs during this period exceeding the performance requirement. IBM's next obligation is to produce 800 jobs for the 12-month period ending June 30, 2025.

As of the report date, IBM was meeting or exceeding all current performance requirements.

SNF HOLDING COMPANY

Water-soluble polymer manufacturing facility

Project announced in 2009

Iberville Parish

SNF Holding Company (SNF) committed to construct a new water-soluble polymers manufacturing facility, including capital investments of \$350 million and employment ramping up to 512 with average salaries of \$57,400, plus benefits, by 2016.

An economic impact analysis by LSU indicates that the more than 500 direct, new on-site jobs will create approximately 900 indirect jobs for a total of 1,400 permanent new jobs in Louisiana and rank SNF as one of Louisiana's top 150 economic-driver firms (out of roughly 120,000 total current employers) based on direct and indirect job impact.

To secure the project, LED offered SNF a performance-based grant of up to \$39.4 million from the Mega-Project Development Fund, including performance-based financial assistance of \$26.55 million for rail spur and other site infrastructure, as well as performance-based incentive payments of \$1.28 million per year starting at the conclusion of project year one (June 30, 2012), for a ten-year period for capital costs related to the project. Grant funds are to be provided on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, \$26.55 million in expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and SNF specifies a five-year development plan for the project, with SNF investing capital according to the following schedule: \$92.2 million by June 30, 2011; an additional \$69.1 million by June 30, 2012; an additional \$69.1 million by June 30, 2013; an additional \$46.1 million by June 30, 2014; and an additional \$46.1 million by June 30, 2015.

The company has committed to produce 512 total new direct jobs according to the following schedule: 118 new direct jobs by June 30, 2012; an additional 123 new direct jobs by June 30, 2013; an additional 94 new direct jobs by June 30, 2014; an additional 67 new direct jobs by June 30, 2015; and an additional 110 new direct jobs by June 30, 2016.

The CEA includes clawback provisions that will require SNF to reimburse the State, with interest, proportionate to any nonperformance against critical commitments in the CEA (principally capital investment, payroll, and taxable purchases obligations). Specifically, the company must reimburse 0.90 percent of any shortfall relative to capital investment commitments, 12.3 percent of any shortfall relative to payroll obligations, and 1.2 percent of any shortfall relative to taxable purchases commitments.

As of the report date, SNF had commenced commercial operations at the new facility and satisfied the capital investment obligations of \$322.6 million. SNF was required to produce \$29.4 million in payroll for the 12-month period ending June 30, 2024. SNF generated \$58.1 million in payroll during this period, exceeding the performance requirement. SNF's next obligation includes \$29.4 million in payroll for the 12-month period ending June 30, 2025.

As of the report date, SNF Holding Company was meeting or exceeding all current performance requirements in the CEA.

^A A total of \$12,347,072 was targeted to be paid from the General Fund, but in accordance with Executive Order BJ 2012-24 Expenditure Reduction and BJ 2012-25 Expenditure Freeze, a means of financing change was authorized to use funds available in the Statutory Dedicated-Rapid Response Fund in lieu of the General Fund. Amounts encumbered and spent as a result of the Executive Orders 2012-24 and 2012-25:

- Nucor \$4,012,725 encumbered and spent
- Ronpak \$459,941 encumbered and spent
- SNF \$1,280,000 encumbered and spent
- CG Rail \$1,632,731 encumbered and spent
- Union Tank \$3,296,625 encumbered and spent
- Saint Gobain \$1,200,000 encumbered and spent
- LSU/EA Sports \$465,000 encumbered and spent

¹ Includes full time and full time equivalent positions.

² Average salary for new positions only; excludes benefits.

³ Estimates for indirect jobs based on standard RIMS multipliers from the U.S. Bureau of Labor Statistics (BLS).

⁴ Includes direct and indirect taxes generated by each project after completion (full employment); includes only impact of new project / employment (i.e., impact of any existing operations not included).

⁵ Company received both MPDF dollars and Rapid Response Fund dollars. The semiannual contract performance will be reported in the Private Sector Mega Project section.

⁶ Company has one contract for two separate facilities, each having their own set of performance obligations (i.e.; Job Commitments, Capex).

IMPORTANT NOTE

1. List of projects on this page and the prior page includes only those for which the Rapid Response Fund (RRF) was utilized – LED has secured many other project wins for which the RRF was not utilized.

PRIVATE SECTOR RAPID RESPONSE FUND PROJECTS

AMAZON SHREVEPORT

Robotics fulfillment center
Project announced in 2021
Caddo Parish

Amazon committed to construct and operate the company's first robotics fulfillment center in Louisiana. The robotics fulfillment center will include contemporary robotics technology, inventory and shipping operations in a multi-level building with a 650,000-square-foot foundation. The project will be located on a LED Certified Site in north Shreveport in the Hunter Industrial Park, near Interstates 20, 49 and 220, and will create over 1,000 full-time jobs with average salaries of \$31,200, plus benefits, by 2024.

One of every five U.S. residents lives within a 500-mile radius of Shreveport, making the location enviable for distribution and logistics companies.

To secure the project, LED offered Amazon a performance-based grant of up to \$5.0 million, payable in two equal installments, to offset infrastructure costs. Grant funds are to be provided to the company on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, no expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and Amazon commits the company to invest or cause the investment on its behalf of at least \$200.0 million on or before January 1, 2024 and begin operations at the fulfillment center on or before June 1, 2024.

Amazon has committed to produce 1,000 total new direct jobs according to the following schedule: 500 new direct jobs by December 31, 2024, and an additional 500 new direct jobs by December 31, 2025.

The CEA includes clawback provisions that require Amazon to reimburse the State, proportionate to any nonperformance against critical commitments in the CEA (principally capital expenditures and payroll obligations). Specifically, if Amazon fails to make the investment in Capital Expenditures for the fulfillment center the company must reimburse the State the full amount of the grant payments received. Additionally, Amazon must reimburse the State at an amount equal to the percentage of any shortfall relative to payroll obligations.

As of the report date, Amazon had exceeded its capital investment obligation of \$200.0 million towards the fulfillment center construction and the project was complete. Under the CEA, the company's performance is assessed annually relative to payroll obligations. The company's first significant obligation will be to produce \$15.6 million in new payroll by December 31, 2024. New payroll obligations will increase the following project year and then remain constant through the term of the contract.

As of the report date, Amazon was meeting or exceeding all current performance requirements in the CEA.

AVIATION EXTERIORS OF LOUISIANA, INC.

Aircraft maintenance facility

Project announced in 2022

Iberia Parish

Aviation Exteriors Louisiana, Inc. (AvEx) committed to expand its commercial aircraft painting facility and add aircraft maintenance and conversions services. The company will invest \$2.5 million to develop a dedicated aircraft maintenance hangar with extensive tooling and equipment for the new services at the company's base of operations at Acadiana Regional Airport near New Iberia. With the addition, AvEx will create 100 new direct jobs with an average annual salary of \$56,867, plus benefits, while retaining 83 existing jobs, by 2024.

The company chose New Iberia, after a thorough search of the Southeast US, to fill a void in today's market to provide world-class service to its loyal aviation customers and the industry.

To secure the project, LED offered AvEx a performance-based grant of up to \$2.0 million for upgrades to a 60-year-old aircraft maintenance hangar that the company will lease from the Iberia Parish Airport Authority. Grant funds are to be provided to the company on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, \$1.0 million in expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and AvEx commits the company to undertake the improvements at the facility and become operational as a commercial aircraft conversion and maintenance company in addition to other company services no later than December 31, 2025.

AvEx has committed to produce 100 total new direct jobs according to the following schedule: 20 new direct jobs by December 31, 2023, and an additional 80 new direct jobs by December 31, 2024.

The CEA includes clawback provisions that require AvEx to reimburse the State, proportionate to any nonperformance against critical commitments in the CEA (principally payroll obligations). Specifically, AvEx must reimburse the State at an amount equal to the percentage of any shortfall relative to payroll obligations.

As of the report date, the company's facility expansion project was 75% complete. Under the CEA, AvEx's performance is assessed annually relative to payroll obligations. The company's first significant obligation was to produce \$1.2 million in new payroll by December 31, 2023. Required reporting by AvEx was submitted timely, however, additional information is required to evaluate the company's 2023 payroll performance. The company's next obligation includes \$5.7 million in payroll for the 12-month period ending December 31, 2024.

As of the report date, AvEx submitted required reports documenting the jobs and payroll performance for Project Year 2023. However, after a review LED returned the reports to the company requesting corrections needed to the information provided so that a complete assessment can be made. A final assessment of the payroll performance for Project Year 2023 will take place upon submission of the corrected required reporting data.

CGI FEDERAL, INC.

Technology center

Project announced in 2014

Lafayette Parish

CGI Federal, Inc. (CGI) committed to establish a technology center in Lafayette, Louisiana creating 400 new direct jobs by 2018. CGI will lease space for its technology center in a 50,000 square-foot space at the University of Louisiana at Lafayette Research Park. CGI will become an anchor tenant of the 143-acre research park.

To secure the project, LED offered CGI a competitive incentive package that includes a performance-based grant of \$5.3 million to reimburse personnel relocation, recruitment, training, and building operating costs. Grant funds are to be provided on a reimbursement basis after expenditures are verified and approved by the State. Additionally, the State will provide the University of Louisiana at Lafayette (UL Lafayette) with a land lease grant of \$400,000 to support the company's leasing of space at the research park. To increase the university's graduates in computer science and related fields, the State will provide UL Lafayette a \$4.5 million grant to expand its School of Computing and Informatics. As of the report date, \$6.2 million in expenditures had been reimbursed by the State to CGI and UL Lafayette.

The company has committed to produce 400 total new direct jobs according to the following schedule: 100 new direct jobs by December 31, 2015; an additional 100 new direct jobs by December 31, 2016; an additional 100 new direct jobs by December 31, 2017; and an additional 100 new direct jobs by December 31, 2018.

The CEA includes clawback provisions that require CGI to reimburse the State, with interest, proportionate to any nonperformance against critical commitments in the CEA (principally payroll obligations). Specifically, the company must reimburse 9.0 percent of any shortfall relative to required payroll obligations.

As of the report date, construction of CGI's permanent facility has been completed. CGI moved into the facility in February 2016. Under the CEA, CGI's performance is assessed annually relative to payroll obligations. The most recent obligation included \$51.9 million in new payroll for the 12-month period ending December 31, 2023. CGI generated \$57.0 million in new payroll during this period, exceeding the performance requirement. The next obligation includes \$54.5 million in new payroll for the 12-month period ending December 31, 2024.

As of the report date, CGI was meeting or exceeding all current performance requirements in the CEA.

CITY OF CARENCRO/ AMAZON

Fulfillment center

Project announced in 2020

Lafayette Parish

Amazon committed to construct and operate a one-million-square foot fulfillment center in the City of Carencro, Louisiana including capital investments of \$100.0 million and creating 500 new direct jobs with average salaries of \$31,200, plus benefits, by 2023. The City of Carencro and Amazon will make public infrastructure improvements required for the construction and operation of the fulfillment center.

Amazon selected the former Evangeline Downs site in Carencro for its fulfillment center because it will be near the junction of Interstates 10 and 49 and provide optimal access to Louisiana markets.

To secure the project, LED offered Amazon a performance-based incentive package that includes grants totaling \$3.25 million, including a \$250,000 contribution from the Lafayette Economic Development Authority (LEDA), to offset facility infrastructure costs. Grant funds are to be provided to the City of Carencro and the company on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, \$2.7 million in expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED, LEDA, the City of Carencro and Amazon commits the company to invest or cause the investment on its behalf of at least \$100.0 million and begin operations at the fulfillment center on or before June 1, 2022.

Amazon has committed to produce 500 total new direct jobs according to the following schedule: 150 new direct jobs by December 31, 2021; an additional 150 new direct jobs by December 31, 2022; and an additional 200 new direct jobs by December 31, 2023.

The CEA includes clawback provisions that require Amazon to reimburse the State, proportionate to any nonperformance against critical commitments in the CEA (principally capital expenditures and payroll obligations). Specifically, if Amazon fails to make the investment in Capital Expenditures for the fulfillment center the company must reimburse the State the full amount of the grant payments made to the City of Carencro. Additionally, Amazon must reimburse the State at an amount equal to the percentage of any shortfall relative to payroll obligations.

As of the report date, Amazon had expended \$100.0 million in capital investments towards the fulfillment center construction and the facility was complete. Under the CEA, the company's performance is assessed annually relative to payroll obligations. The most recent obligation included \$15.6 million in new payroll for the 12-month period ending December 31, 2023. Amazon generated \$37.5 million in new payroll during this period, exceeding the performance requirement. The next obligation includes \$15.6 million in payroll for the 12-month period ending December 31, 2024.

As of the report date, Amazon was meeting or exceeding all current performance requirements in the CEA.

CYBERSPACE INNOVATION CENTER/COMPUTER SCIENCE CORP.

Technology center

Project announced in 2014

Bossier Parish

Computer Science Corporation (CSC) committed to establish a technology center in Bossier City, Louisiana creating 800 new direct jobs by 2018. CSC will lease space for its technology center in an 116,000 square-foot space at the National Cyber Research Park. The park is being developed by Cyberspace Innovation Center, a not-for-profit research corporation. CSC will become an anchor tenant of the 3,000-acre research park.

CSC chose this site because of the willingness of the state, city, and local educational community to fully partner on developing a next-generation information technology workforce.

To secure the project, LED offered CSC a competitive incentive package that includes a performance-based grant of \$9.6 million to reimburse personnel relocation and recruitment expenses. Grant funds are to be provided on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, \$9.1 million in expenditures had been reimbursed by the State.

The company has committed to produce 800 total new direct jobs according to the following schedule: 192 new direct jobs by June 30, 2015; an additional 192 new direct jobs by June 30, 2016; an additional 192 new direct jobs by June 30, 2017; and an additional 224 new direct jobs by June 30, 2018.

The CEA includes clawback provisions that require CSC to reimburse the State, with interest, proportionate to any nonperformance against critical commitments in the CEA (principally payroll obligations). Specifically, the company must reimburse 12.48 percent of any shortfall relative to required payroll obligations.

As of the report date, CSC's permanent facility at the research park was completed. The company moved to the new facility in October 2016. CSC is required to produce \$43.7 million in new payroll for the 12-month period ending June 30, 2024. The company generated \$43.8 million in new payroll during this period exceeding the performance requirement. CSC's next obligation includes \$44.5 million in new payroll for the 12-month period ending June 30, 2025.

As of the report date, CSC was meeting or exceeding all current performance requirements in the CEA.

ELEMENT 25 (LOUISIANA), LLC.

High-purity manganese sulphate monohydrate production facility

Project announced in 2023

Ascension Parish

Element 25 (Louisiana), LLC (Element 25), an Australian mining company, committed to construct a high-purity manganese sulfate monohydrate (HPMSM) production facility in Ascension Parish, including capital investments of at least \$320 million and employment ramping up to 220 new direct jobs with average salaries of more than \$90,000 by 2028.

The new facility will be the first in the Western Hemisphere to manufacture HPMSM, a critical component in electric vehicle batteries. Element 25 considered Louisiana because of the attractive incentives offered by the state.

To secure the project, LED offered Element 25 a performance-based grant of \$6.0 million to offset infrastructure costs to support the construction project. Grant funds are to be provided on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, no expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and Element 25 commits the company to begin operations and spend at least \$320.0 million in capital expenditures by December 31, 2027.

The company has committed to produce 220 total new direct jobs according to the following schedule: 160 new direct jobs by December 31, 2027; and an additional 60 new direct jobs by December 31, 2028. Under the CEA, LED will assess Element 25's performance annually relative to payroll obligations.

The CEA includes clawback provisions that require Element 25 to reimburse the State proportionate to any nonperformance against critical commitments in the CEA (principally payroll obligations). Specifically, the company must reimburse 4.33 percent of any shortfall relative to required payroll obligations.

Element 25 will report on the progress of the production facility construction project semi-annually, including capital expenditures, beginning June 30, 2027. The company's first significant obligation will be to produce \$14.4 million in new payroll by December 31, 2027. New payroll obligations will increase each year thereafter.

As of the report date, Element 25 was meeting or exceeding all current performance requirements in the CEA.

FIRST SOLAR, INC.

Manufacturing facility

Project announced in 2023

Iberia Parish

First Solar, Inc. (First Solar) committed to establish a solar panel production site in Iberia parish, including capital investments of \$1.1 billion and creating 715 new direct jobs with average annual salaries of more than \$66,000 by 2034.

First Solar selected this site because of Louisiana's ability to deliver the talent the company needs via the state's extensive workforce development initiatives, and the presence of academic institutions, such as University of Louisiana at Lafayette that features a world-class solar energy lab.

To secure the project, LED offered First Solar a performance-based grant of \$30.0 million to offset site development and infrastructure improvement costs to support the expansion project. Grant funds are to be provided on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, no expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and First Solar commits the company to begin operations and spend at least \$1.1 billion in capital expenditures by January 1, 2026.

The company has committed to produce 715 total new direct jobs according to the following schedule: 100 new direct jobs by December 31, 2025; an additional 500 new direct jobs by December 31, 2026; and an additional 115 new direct jobs by December 31, 2027. Under the CEA, LED will assess First Solar's performance annually relative to payroll obligations.

The CEA includes clawback provisions that require First Solar to reimburse the State proportionate to any nonperformance against critical commitments in the CEA (principally capital expenditures and payroll obligations). Specifically, the company must reimburse 1.62 percent of any shortfall relative to capital expenditures and 11.42 percent of any shortfall relative to required payroll obligations.

First Solar will report on the progress of the facility construction project semi-annually, including capital expenditures, beginning December 31, 2025. The company's first significant obligation will be to produce \$5.6 million in new payroll by December 31, 2025. New payroll obligations will increase each year thereafter.

As of the report date, First Solar was meeting or exceeding all current performance requirements in the CEA.

IBM

Application development and innovation center
Project announced in 2015
Ouachita Parish

IBM committed to establish an application development and innovation center in Monroe, Louisiana creating 400 new direct jobs by 2021. The company will be an anchor tenant at an 88-acre CenturyLink affiliated technology park.

The IBM center in Monroe represents a multifaceted, transformational partnership that will include expanded higher education programs related to computer science, as well as a major new technology park and mixed-use, real estate development that will catalyze new economic growth opportunities in Monroe. The IBM center will employ a broad range of college graduates and experienced professionals with backgrounds in computer science and other quantitative intense fields, such as engineering, mathematics and science. For the IBM project, the State will provide \$4.5 million in funding over 10 years for expanded higher education programs designed primarily to increase the number of annual computer science graduates in Northeast Louisiana. The University of Louisiana at Monroe will expand its computer science and computer information systems programs, while Louisiana Tech and Grambling State University will expand their technology programs in related areas, such as cyber engineering and data analytics. The State will provide \$12 million for construction of new office space for use by IBM, which will become an anchor tenant of the privately developed mixed-use complex. A University of Louisiana at Monroe foundation will own the IBM space and lease the space to the company. LED offered IBM a performance-based incentive package of up to \$7.7 million for the relocation, recruitment, training, and operating costs associated with the Monroe center. As of the report date, \$5.1 million in expenditures had been reimbursed by the State towards the project.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and IBM commits the company to begin operations no later than December 31, 2015.

The company has committed to produce 400 total new direct jobs according to the following schedule: 50 new direct jobs by March 31, 2016; an additional 50 new direct jobs by March 31, 2017; an additional 50 new direct jobs by March 31, 2018; an additional 50 new direct jobs by March 31, 2019; an additional 100 new direct jobs by March 31, 2020; and an additional 100 new direct jobs by March 31, 2021. Under the CEA, IBM's performance is assessed annually relative to its jobs obligations.

The CEA includes clawback provisions that require IBM to reimburse the State, with interest, proportionate to any nonperformance against critical commitments in the CEA (principally jobs). Specifically, the company must reimburse \$5,000 multiplied by any shortfall in jobs each year.

As of the report date, IBM moved into its permanent facility. The access roads and the parking lot surrounding the facility had been completed. The company's most recent obligation was to produce 400 jobs for the 12-month period ending March 31, 2024. IBM generated 248 jobs during this period. The company met the 2024 job performance requirement by coupling its actual job performance with jobs credits earned for exceeding performance requirements at the Baton Rouge facility. IBM's next obligation is to produce 400 jobs for the 12-month period ending March 31, 2025.

As of the report date, IBM was meeting or exceeding all current performance requirements.

INTRALOX, LLC

Manufacturing facility

Project announced in 2021

Tangipahoa Parish

Intralox, LLC (Intralox) committed to expand its Hammond manufacturing facility, including capital investments of \$60 million and creating 425 direct new by 2030, increasing average annual payroll by \$10 million. Intralox will make the expansion and infrastructure improvements required of the operation of the manufacturing facility.

The expansion project will more than double the facility's current footprint, adding 300,000 square feet to the 130,000 square-foot building. Modular plastic conveyor belts and components produced at the state-of-the-art facility are shipped to Intralox assembly facilities across the world. Once completed the expansion project will increase the Hammond facility's belting output by 50 percent.

To support the expansion of the Intralox facility in Hammond, the state of Louisiana provided the company with a competitive incentive package that includes a \$1 million performance-based grant to support infrastructure improvements. As of the report date, no expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and Intralox commits the company to complete \$58 million in capital expenditures by January 31, 2023.

The company has committed to retain 1,869 existing jobs state-wide through December 31, 2032 and produce 425 total new direct jobs according to the following schedule: 43 new direct jobs by December 31, 2023; an additional 43 new direct jobs by December 31, 2024; an additional 43 new direct jobs by December 31, 2025; an additional 43 new direct jobs by December 31, 2026; an additional 43 new direct jobs by December 31, 2027; an additional 43 new direct jobs by December 31, 2028; an additional 42 new direct jobs by December 31, 2029; an additional 42 new direct jobs by December 31, 2030; an additional 42 new direct jobs by December 31, 2031; and an additional 41 new direct jobs by December 31, 2032.

The CEA includes clawback provisions that require Intralox to reimburse the State, proportionate to any nonperformance against critical commitments in the CEA (principally capital expenditures and payroll obligations). Specifically, Intralox will be required to reimburse the State for the full amount of the grant funds if they do not meet their capital expenditure obligation; and must reimburse the State at an amount equal to the percentage of any shortfall relative to payroll obligations.

As of the report date, Intralox had exceeded its capital investment obligation of \$58.0 million in capital investments towards the manufacturing facility expansion and the project was complete. Under the CEA, the company's performance is assessed annually relative to payroll obligations. Intralox's first significant obligation was to produce \$1.7 million in new payroll by December 31, 2023. The company generated \$3.1 million in new payroll during this period, exceeding the performance requirement. Intralox's next obligation includes \$3.6 million in payroll for the 12-month period ending December 31, 2024.

As of the report date, Intralox was meeting or exceeding all current performance requirements in the CEA.

Subsequent to the reporting period, the CEA between Intralox and LED was amended. The First Amendment modified the company's new payroll and jobs obligations. These changes are reflected in the data above.

IRIAPAK USA, LLC

Manufacturing facility

Project announced in 2020

Orleans Parish

Iriapak USA, LLC (Iriapak) committed to establish a packaging film manufacturing facility in eastern New Orleans, creating 22 new direct jobs with average salaries of \$38,953, plus benefits, by 2023. The company will occupy a site in the New Orleans Regional Business Park.

Iriapak selected the location in New Orleans East because it offers incredible access to the entire East Coast of the U.S., an immense labor market; a regulatory infrastructure; and exceptional port facilities for the company to import materials and export products.

To secure the project, LED offered Iriapak a performance-based grant of up to \$250,000 to offset site infrastructure improvements. Grant funds are to be provided on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, \$0.2 million in expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and Iriapak commits the company to complete at least \$4.5 million in capital investments for the purchase of property, as well as, constructing and outfitting the facility by June 30, 2021. In addition, Iriapak commits to expend a cumulative amount of at least \$5.8 million in capital investments by December 31, 2024.

Iriapak has committed to produce 22 total new direct jobs according to the following schedule: 6 new direct jobs by June 30, 2022; an additional 9 new direct jobs by June 30, 2023; and an additional 7 new direct jobs by June 30, 2024. Under the CEA, the company's performance is assessed annually relative to payroll obligations.

The CEA includes clawback provisions that require Iriapak to reimburse the State, proportionate to any nonperformance against critical commitments in the CEA (principally capital expenditures and payroll obligations). Specifically, Iriapak will not receive grant funds if they do not meet their capital expenditure obligation; and must reimburse the State at an amount equal to the percentage of any shortfall relative to payroll obligations.

As of the report date, Iriapak had expended \$4.7 million in capital investments toward the manufacturing facility and had commenced operation in its new facility. The company is required to produce \$0.6 million in new payroll by June 30, 2023. Iriapak has not submitted required reports needed to evaluate the company's 2023 payroll performance. The company's next obligation includes \$0.9 million in payroll for the 12-month period ending June 30, 2024.

As of the report date, Iriapak had not reported jobs performance for Project Year 2023. An assessment of 2023 performance will take place upon submission of the required reporting data.

METHANEX USA, LLC
Methanol manufacturing plant
Project announced in 2012
Ascension Parish

Methanex will relocate a methanol production plant from Chile to a 225-acre site in Geismar, Louisiana. The company will invest \$550 million on this project, which will give the company its first U.S. based methanol production facility in more than a decade. The new plant will create 130 new jobs, with an average salary of \$56,250, plus benefits, by 2015.

Methanex's new facility will produce methanol. Methanex's selection of Geismar was based on the area's abundance of natural resources, a skilled workforce, and easy access to barge, rail, and interstate transportation.

To secure the project, LED offered Methanex performance-based grants of \$3.8 million to offset infrastructure costs related to the project and \$1.5 million to reimburse relocation expenses. Grant funds are to be provided on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, \$1.5 million in expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and Methanex commits the company to spend not less than \$400 million in capital expenditures by December 31, 2014.

The company has committed to produce 130 total new direct jobs by December 31, 2015.

The CEA includes clawback provisions that require Methanex to reimburse the State, with interest, proportionate to any nonperformance against critical commitments in the CEA (principally capital expenditures and payroll obligations). Specifically, the company must reimburse 1.4 percent of any shortfall relative to capital expenditures and 10.8 percent of any shortfall relative to required payroll obligations.

As of the report date, Methanex had completed construction of the methanol plant and was operational. The company's capital investment in the plant was \$558 million, exceeding the capital expenditure requirement. Under the CEA, Methanex's performance is assessed annually relative to payroll obligations. The most recent obligation included \$8.6 million in payroll for the 12-month period ending December 31, 2023. Methanex generated \$20.7 million in payroll during this period, exceeding the performance requirement. The next obligation includes \$8.8 million in payroll for the 12-month period ending December 31, 2024.

As of the report date, Methanex was meeting or exceeding all current performance requirements in the CEA.

RAIN CII CARBON, LLC
Corporate headquarters
Project announced in 2013
St. Tammany Parish

Rain CII Carbon, LLC (Rain CII) committed to relocating its corporate headquarters to Covington, Louisiana creating 71 new direct jobs with average salaries of \$102,700, plus benefits, by 2019. Rain CII will construct its approximately 40,000 square-foot headquarters building in the Northpark Business Park.

Rain CII chose this site because of Louisiana's successful business climate and the quick recovery and revitalization of the Greater New Orleans area.

To secure the project, LED offered Rain CII a competitive incentive package that includes a performance-based grant of \$3.6 million to offset headquarters relocation costs. Grant funds are to be provided on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, \$1.6 million in expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and Rain CII commits the company to spend not less than \$65.0 million in capital expenditures by December 31, 2019.

The company has committed to produce 71 total new direct jobs according to the following schedule: 62 new direct jobs by December 31, 2015; an additional two new direct jobs by December 31, 2016; an additional two new direct jobs by December 31, 2017; an additional two new direct jobs by December 31, 2018; and an additional three new direct jobs by December 31, 2019.

The CEA includes clawback provisions that require Rain CII to reimburse the State, with interest, proportionate to any nonperformance against critical commitments in the CEA (principally capital expenditures and payroll obligations). Specifically, the company must reimburse 2.49 percent of any shortfall relative to capital expenditures and 3.69 percent of any shortfall relative to required new payroll obligations.

As of the report date, the company has completed construction of its new corporate headquarters and has completed the relocation to the new building. Under the CEA, Rain CII's performance is assessed annually relative to new payroll obligations. The most recent obligation included \$9.0 million in new payroll for the 12-month period ending December 31, 2023. Rain CII generated \$9.0 million in new payroll during this period, meeting the performance requirement. The next obligation includes \$9.4 million in new payroll for the 12-month period ending December 31, 2024.

As of the report date, Rain CII was meeting or exceeding all current performance requirements in the CEA.

SAFESOURCE DIRECT, LLC

Manufacturing facilities

Project announced in 2021

Lafayette Parish and St. Martin Parish

SafeSource Direct, LLC (SafeSource) committed to construct two manufacturing facilities for personal protective equipment (PPE) in Lafayette Parish and St. Martin Parish. The Acadiana Region projects will create a combined 1,221 new direct jobs with average salaries of \$45,300 at the Lafayette Parish facility and \$38,000 at the St. Martin Parish facility, plus benefits, by 2023.

Ochsner Health partnered with Trax Development on a joint venture to create SafeSource Direct, LLC. SafeSource is investing \$73 million to retrofit an 80,000-square-foot manufacturing facility in Lafayette Parish, and \$77 million for the development of a new 400,000-square-foot manufacturing facility in St. Martin Parish. The Lafayette Parish facility will include the company's headquarters and a manufacturing plant for surgical tie-masks, bouffant hair covers, shoe covers, isolation gowns, procedure masks and N95 masks. The St. Martin Parish facility will include multiple production lines for PPE manufacturing, with nitrile rubber gloves as the main product.

To secure the project, LED offered SafeSource a \$2.5 million performance-based grant for the Lafayette facility and a performance-based grant of up to \$8.0 million for the St. Martin facility to offset facility infrastructure costs. Grant funds are to be provided on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, \$2.1 million in expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and SafeSource commits the company to complete \$77.5 million in capital investments for the construction of the St. Martin facility and \$73.7 million in capital investments for the Lafayette facility by December 31, 2024.

The company has committed to produce 976 total new direct jobs at the St. Martin facility according to the following schedule: 397 new direct jobs by December 31, 2021; an additional 379 new direct jobs by December 31, 2022; and an additional 200 new direct jobs by December 31, 2023. SafeSource has also committed to produce 245 total new direct jobs at the Lafayette facility according to the following schedule: 166 new direct jobs by December 31, 2021; an additional 38 new direct jobs by December 31, 2022; and an additional 41 new direct jobs by December 31, 2023.

The CEA includes clawback provisions that require SafeSource to reimburse the State, with interest, proportionate to any nonperformance against critical commitments in the CEA (principally capital expenditures and payroll obligations). Specifically, if the company fails to meet the investment in capital expenditures for both facilities, the total amount of the performance-based grants will be reduced by the percentage equal to the capital expenditures shortfall. Additionally, SafeSource must reimburse the State at an amount equal to the percentage of any shortfall relative to payroll obligations.

As of the report date, SafeSource had expended \$119.0 million in capital investments towards the St. Martin facility construction and the project was complete. Under the CEA, the company's performance at this facility is assessed annually relative to payroll obligations. SafeSource was required to produce \$37.0 million in new payroll by December 31, 2023 at the St. Martin facility. The company generated \$22.7 million in new payroll during this period, missing the performance requirement. SafeSource's next obligation includes \$37.8 million in payroll for the 12-month period ending December 31, 2024.

As of the report date, SafeSource had also expended \$53.0 million in capital investments towards the Lafayette facility construction and the project was complete. Under the CEA, the company's performance at this facility is assessed annually relative to payroll obligations. SafeSource was required to produce \$11.1 million in new payroll by December 31, 2023 at the Lafayette facility. The company generated \$5.3 million in new payroll during this period, missing the performance requirement. SafeSource's next obligation includes \$11.3 million in payroll for the 12-month period ending December 31, 2024.

As of the report date, SafeSource was meeting about 61 percent of the payroll obligation specified in the CEA at the St. Martin Facility and about 47 percent of the payroll obligation specified in the CEA at the Lafayette Facility. Accordingly, LED proportionally reduced the company's PY 2023 annual performance-based incentive payment for both facilities.

SELECT COMFORT CORPORATION

Technical support contact center

Project announced in 2017

Jefferson Parish

Select Comfort Corporation (Select Comfort) committed to establish a technical support contact center in Jefferson Parish creating 225 new direct jobs with average salaries of \$30,000, plus benefits, by 2021.

Select Comfort will occupy an office building in the Elmwood business corridor, where employees will provide its sales and support services for customers of the company's Sleep Number® beds and accessory products.

To secure the project, LED offered Select Comfort a performance-based grant of \$800,000 to reimburse the company for lease assistance, infrastructure costs, and relocation expenses. Grant funds are to be provided on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, \$0.8 million in expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and Select Comfort commits the company to begin operations no later than September 2017.

The company has committed to produce 225 total new direct jobs according to the following schedule: 100 new direct jobs by June 30, 2018; an additional 75 new direct jobs by June 30, 2019; an additional 25 new direct jobs by June 30, 2020; and an additional 25 new direct jobs by June 30, 2021. Under the CEA, Select Comfort's performance is assessed annually relative to payroll obligations.

The CEA includes clawback provisions that require Select Comfort to reimburse the State, with interest, proportionate to any nonperformance against critical commitments in the CEA (principally payroll obligations). Specifically, the company must reimburse 2.74 percent of any shortfall relative to required payroll obligations.

As of the report date, Select Comfort began its operations in Jefferson Parish. Under the CEA, Select Comfort's performance is assessed annually relative to payroll obligations. The most recent obligation included \$7.6 million in payroll for the 12-month period ending June 30, 2024. The company generated \$5.7 million in new payroll during this period. Select Comfort met the 2024 performance requirement by coupling \$5.7 million in payroll with previously earned payroll credits. The next obligation includes \$7.8 million in payroll for the 12-month period ending June 30, 2025.

As of the report date, Select Comfort was meeting or exceeding all current performance requirements in the CEA.

SHINTECH LOUISIANA, LLC

Manufacturing and packaging facilities

Project announced in 2021

Iberville Parish and West Baton Rouge Parish

Shintech Louisiana, LLC (Shintech) committed to expand its manufacturing and packaging facilities in Iberville and West Baton Rouge parishes. The company will make a \$1.25 billion investment to increase PVC manufacturing and expand chlor-alkali and vinyl chloride monomer capacity at its manufacturing facility in Plaquemine. The company is also expanding its PVC packaging and warehouse operation in Addis. In Plaquemine, Shintech's manufacturing expansion will create 30 new direct jobs with an average annual salary of \$86,000, plus benefits, by 2024. The company will also retain 530 existing jobs at the Iberville and West Baton Rouge facilities.

Shintech is expanding its facilities to keep pace with the demand for PVC, a versatile, durable product used in a variety of applications in the building and construction industries as well as health care, electronics, automobile and other sectors.

To secure the project, LED offered Shintech a performance-based grant of \$6.6 million to offset construction, procurement and infrastructure costs to support the expansion project. Grant funds are to be provided on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, no expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and Shintech commits the company to spend at least \$1.25 billion in capital expenditures by December 31, 2025.

The company has committed to produce 30 total new direct jobs according to the following schedule: 15 new direct jobs by December 31, 2023; and an additional 15 new direct jobs by December 31, 2024. Under the CEA, Shintech's performance is assessed annually relative to payroll obligations.

The CEA includes clawback provisions that require Shintech to reimburse the State, with interest, proportionate to any nonperformance against critical commitments in the CEA (principally capital expenditures and payroll obligations). Specifically, the company must reimburse an amount equal to the percent of any shortfall relative to capital expenditures and 8.78 percent of any shortfall relative to required payroll obligations.

As of the report date, Shintech had expended \$1.2 billion in capital investments and the expansion project was approximately 95-98% complete. Under the CEA, the company's performance is assessed annually relative to payroll obligations. Shintech's first significant obligation was to produce \$1.4 million in new payroll by December 31, 2023. The company generated \$3.6 million in payroll during this period, exceeding the performance requirement. Shintech's next obligation includes \$2.6 million in payroll for the 12-month period ending December 31, 2024.

As of the report date, Shintech was meeting or exceeding all current performance requirements in the CEA.

US FOODS, INC.

Distribution facility

Project announced in 2018

Jefferson Parish

US Foods, Inc. (US Foods) committed to expand the F. Christiana distribution facility in Marrero, retaining 140 existing jobs and creating 45 new direct jobs by 2027 with an annual salary of \$46,000, plus benefits. The investment will triple the size of the facility to 200,000 square feet in support of expanding distribution opportunities across the region.

The company explored a wide variety of markets for the investment. US Foods chose this location because the expansion of the F. Christiana facility will allow the company to continue to grow and serve more customers throughout Louisiana.

To secure the project, LED offered US Foods a performance-based grant of up to \$1.5 million to offset the cost of facility improvements and construction upgrades to the site and facility. As of the report date, \$1.0 million in expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and US Foods commits the company to complete \$51.9 million in capital investments at the facility by December 31, 2022.

The company has committed to retain 198 existing jobs and produce 45 total new direct jobs according to the following schedule: 10 new direct jobs by December 31, 2024; an additional nine new direct jobs by December 31, 2025; an additional eight new direct jobs by December 31, 2026; an additional 13 new direct jobs by December 31, 2027; and an additional five new direct jobs by December 31, 2028.

The CEA includes clawback provisions that will require US Foods to reimburse the State proportionate to any nonperformance against critical commitments in the CEA, principally capital expenditures, retained jobs, and payroll obligations. Specifically, US Foods will not receive grant funds if they do not meet their capital expenditure obligation; suffer a reduction or forfeit grant funds for not meeting the retained jobs obligations; and reimburse the State 15.5 percent of any shortfall relative to new payroll obligations.

As of the report date, the expansion project was complete and the company had expended \$64.0 million in capital investments, exceeding the capital expenditure requirement. Under the CEA, the company's performance is assessed annually relative to payroll obligations. The company's first significant obligation will be to produce \$0.5 million in new payroll by December 31, 2024. New payroll obligations will increase each year thereafter.

As of the report date, US Foods was meeting or exceeding all current performance requirements in the CEA.

PUBLIC SECTOR RAPID RESPONSE FUND PROJECTS

BPCC FOUNDATION, INC.

Center for Advanced Manufacturing and Engineering Technologies
Bossier Parish

The State commitment of \$3.0 million to BPCC Foundation, Inc. (Foundation) provides for the expansion and operation of the Center for Advanced Manufacturing and Engineering Technologies located on the campus of Bossier Parish Community College.

The 65,000 square foot Center for Advanced Manufacturing and Engineering Technologies was dedicated in October 2014. It immediately began supporting training efforts for manufacturing projects in Shreveport. The center features specialized equipment and curricula focused on industrial technology and advanced manufacturing, and serves students in the BPCC's Division of Technology, Engineering, and Mathematics while supporting various certification programs that target manufacturing skills.

The cooperative endeavor agreement (CEA) commits the State to provide the Foundation with a grant of \$3.0 million towards for the renovation and operation of the Center for Advanced Manufacturing and Engineering Technologies. The Foundation will serve as the fiscal agent and oversee the project. In addition to the renovation, grant funds are to be utilized for the expansion of training and certification programs in areas such as industrial maintenance, advanced manufacturing, and mechatronics while increasing substantially the number of annual graduates in selected fields. The center is to support the region's workforce needs and growth of its manufacturing sector. The State will make an initial payment of \$1.54 million to the Foundation and an annual payment of \$365,000 in each of the four subsequent project years. As of the report date, \$1.54 million in expenditures had been reimbursed by the State.

Progress towards the project was delayed due to the COVID 19 Pandemic, which resulted in reduced student enrollment and a lack of industry demand. As of the report date, the Foundation has resumed activity on the project. Additionally, the majority of the construction on the training bays at the facility was completed with only minor finishing issues needing to be completed. BPCC has also experienced steady growth in program graduates, certification completions, and industry partnerships.

As of the report date, BPCC Foundation was meeting or exceeding all current performance requirements in the CEA.

SHREVEPORT AIRPORT AUTHORITY

Aircraft maintenance facility

Project announced in 2018

Caddo Parish

Western Global Airlines (Western Global) committed to establish an aircraft maintenance facility in Shreveport, Louisiana including capital investments of \$3.0 million for tooling and equipment and creating 170 new direct jobs with average salaries of \$45,200, plus benefits, by 2027. Western Global will lease space for its maintenance facility in an 152,000-square-foot hanger at the Shreveport Regional Airport. The Shreveport Airport Authority will renovate the hangar and lease it to the company.

Western Global selected Shreveport as a conveniently located and well-qualified hub for maintaining its fleet of 16 Boeing 747 and McDonnell Douglas MD-114 wide-body freighter aircraft.

To secure the project, LED offered the Shreveport Airport Authority a performance-based grant of \$1.0 million to offset the renovation costs associated with the Hangar. Grant funds are to be provided on a reimbursement basis after expenditures are verified and approved by the State. As of the report date, \$0.9 million in expenditures had been reimbursed by the State.

The cooperative endeavor agreement (CEA) between the state of Louisiana/LED and the Shreveport Airport Authority commits Western Global to begin operations at the facility no later than December 2018.

Western Global has committed to produce 170 total new direct jobs according to the following schedule: 75 new direct jobs by December 31, 2019; an additional 25 new direct jobs by December 31, 2020; an additional 10 new direct jobs by December 31, 2021; an additional 10 new direct jobs by December 31, 2022; an additional 10 new direct jobs by December 31, 2023; an additional 10 new direct jobs by December 31, 2024; an additional 10 new direct jobs by December 31, 2025; an additional 10 new direct jobs by December 31, 2026; and an additional 10 new direct jobs by December 31, 2027.

The CEA includes clawback provisions that require the Shreveport Airport Authority to reimburse the State, with interest, proportionate to any nonperformance against critical commitments in the CEA (principally payroll obligations). Specifically, the authority must reimburse 3.93 percent of any shortfall relative to required payroll obligations.

As of the report date, Western Global began its operations in Caddo Parish. Under the CEA, the Shreveport Airport Authority's performance is assessed annually relative to payroll obligations. The most recent obligation included \$5.9 million in payroll for the 12-month period ending December 31, 2023. The company generated \$4.6 million in payroll during this period, missing the performance requirement. The next obligation includes \$6.4 million in payroll for the 12-month period ending December 31, 2024.

As of the report date, Western Global Airlines was meeting about 79 percent of the payroll obligation specified in the CEA. LED will work with Shreveport Airport Authority on the company's underperformance as it relates to the airport's obligations in the CEA.
