Quality Jobs Late Renewals

Board Meeting - Renewal Summary

An application to renew a contract shall be filed within 60 days of the initial contract expiring. The board may approve a request for renewal filed more than 60 days but less than five years after expiration of the initial contract, and may impose a penalty for the late filing of the renewal request.

Options of the Board:

Approve the 5 year renewal

Approve with a penalty

Deny the request for renewal

The following contracts have filed for renewal after the original contract expiration date:

Enterprise Zone Program

C & I Board Meeting

October 22, 2025

Special Request Summary

Contract Termination Request

In accordance with Section §717.D of the Enterprise Zone Program rules, a business may submit a request to terminate their Enterprise Zone contract if: 1. the contracts have been in effect for at least 30 months; 2. the business has met all of the requirements of the program, which includes timely filing of all program forms, documents, and appropriate fees. **AUTHORITY NOTE:** Promulgated in accordance with R.S. 51:1786(5). **HISTORICAL NOTE:** Promulgated by the Department of Economic Development, Office of Business Development, LR 29:2301 (November 2003), amended LR 37:2373 (August 2011).

The following contracts were previously approved by the Board of Commerce & Industry, and the contract holders listed below have submitted a request to terminate their Enterprise Zone contracts. The Contractee understands Board decision is final and contracts cannot be reinstated or reactivated.

**** §503. Advance Notification; Application**

C. An application for tax exemption may be filed with the department on the prescribed form, subject to the following conditions:

6. If the application is submitted after the filing deadline, the term of exemption available under an initial contract and renewal thereof shall be reduced by one year for each year or portion thereof that the application is late, up to a maximum reduction up to the maximum remaining term. The board may impose any other penalty for late filing that it deems appropriate.

Syrah Technologies LLC Contract(s): 20170465, 20190474, and 20210484
UBE C1 Chemicals America, Inc. Contract(s): 20230256
Westlake Vinyls Company, LP Contract(s): 20190290-D
W.R. Grace & Co.-Conn Contract(s): 20230485, 20230486, 20240003, and 20240023

SPECIAL REQUESTS

● **Skyfall Biologicals, LLC (Contract #20210383-ITE):**

Skyfall Biologicals, LLC is requesting to amend their existing Exhibit A agreement for Contract #20210383-ITE to amend Sections 4.02(D) and Section 6.01(B)(1) to read “three” instead of “two” years, to extend the commencement of operations and the grace period to be fully operational by June 30, 2025 and adjust the Project Years accordingly.

From the Company:

“Skyfall Biologicals, LLC began pursuing its project and ITEP participation by filing its Application with a start date of 11/1/2021 with an anticipated completion date of 7/1/2022. At this time, the company did not expect a significant delay in the initial construction of their facility due to the COVID-19 pandemic, global supply chain issues, material and labor shortages that continued for several years following.

The company has passed its original planned Commencement of Operations date of July 1, 2022 (Exhibit A Agreement Section 4.02(A)) as well as the end of the 2-year additional grace period provided in this Agreement (Section 6.01(B)(1)) to have commenced Operations, June 30, 2024.

Therefore, please accept this letter as Skyfall Biologicals, LLC formal request to amend Exhibit A Agreement Sections 4.02(D) and 6.01(B)(1), to read "three" instead of "two" years, effectively extending the commencement of operations and the grace period to be fully operational by June 30, 2025 and adjusting the Project Years, accordingly.

Skyfall Biologicals, LLC placed a portion of the facility in service 10/1/2024, and the remainder of their facility in service in 4/1/2025. So, this one-year extension should be more than enough to cover the additional time needed. We appreciate your time and consideration on this matter.”

SPECIAL REQUESTS (Continued)**• Beaver Lake Renewable Energy, LLC (Contract #20230120-ITE):**

Beaver Lake Renewable Energy, LLC is requesting to amend their existing Exhibit A agreement for Contract #20230120-ITE to extend the Project Year Adjustment time limit outlined in the Contract, Exhibit A, Article VI, Section 6.01(B)(1) by one year, allowing a 3-year grace period, instead of 2 years, to commence operation.

From the Company:

"Please accept this letter as Beaver Lake Renewable Energy, LLC's ("Beaver Lake") request to extend the "Commencement of Operation" date, as stated in the Contract for Exemption of Ad Valorem Taxes, Contract # 20230120 (the "Contract"). Beaver Lake requests to extend the Project Year Adjustment time limit outlined in the Contract, Exhibit A, Article VI, Section 6.01(B)(1) by one year.

Beaver Lake originally planned for its project to commence operations in late 2026 or early 2027, but as the project schedule becomes better defined during the development phase, it may take longer to complete. Beaver Lake is working to complete its engineering and begin construction in order to begin operations as soon as possible, but the size and complexity of the project likely require the extension of the original Commencement of Operations date.

Beaver Lake is well underway with its engineering and design activities and is actively submitting permit applications required for the project to commence construction. The project will cost nearly two billion dollars to complete and create more than 100 new direct jobs and over 500 indirect jobs. Further, Beaver Lake will spend millions of dollars in the local community annually operating the project. By way of example, Beaver Lake's projected annual biomass feedstock spend is expected to exceed 50 million dollars and help revitalize the local forestry industry.

As a result of the increased project definition, Beaver Lake reconfirms its commitments related to investment, job creation and payroll projections. Beaver Lake respectfully requests to amend the Contract to allow Commencement of Operations date to better match the project's current timeline. Specifically, Beaver Lake requests to extend the time outlined in Article VI, Section 6.01(B)(1) by one year.

Beaver Lake is working to progress the project as quickly as possible and is excited to complete the project and begin operations, but due to the size and complexity of the project, Beaver Lake needs more time."

SPECIAL REQUESTS (Continued)**• Louisiana LNG Infrastructure LLC (Contract #20161566-ITE):**

Louisiana LNG Infrastructure LLC is requesting to (a) modify Section 4.02(A) of Exhibit A to reflect that Woodside intends to Commence Operation by December 31, 2029 and become Fully Operational by December 31, 2033 and (b) modify Section 6.01(B)(1) of Exhibit A to reflect a Company Default will occur if Woodside does not Commence Operations within a 3-year period beginning on December 31, 2029.

From the Company:

"On October 9, 2024, Woodside Energy announced it had completed the acquisition of Tellurian Inc. and its US Gulf Coast Driftwood LNG development opportunity and renamed the opportunity Louisiana LNG. With the acquisition, Woodside also inherited the existing ITEP contract the State entered into with Tellurian on December 18, 2018 and later amended on February 18, 2022 (including the Amended and Restated Cooperative Endeavor Agreement between State and the Louisiana Economic Development and Driftwood LNG LLC dated February 18, 2022) (Exhibit A).

On April 29, 2025, less than seven months after acquiring the project, Woodside announced it made a final investment decision (FID) to develop the \$17.5 billion, three-train, 16.5 million tonnes per annum (Mtpa) foundation development of the Louisiana LNG project. The development has expansion capacity for two additional LNG trains and is fully permitted for total capacity of 27.6 Mtpa. Woodside is targeting first LNG production in 2029.

Since FID, the construction workforce at Louisiana LNG has ramped up to almost 900 personnel with work on the first LNG train 22% complete. Progress has also been made on marketing arrangements for the project's output, with an agreement signed in April 2025 for the sale of 1 Mtpa from Louisiana LNG LLC and 1.0 Mtpa from Woodside's global portfolio to Uniper, with both agreements coinciding with Louisiana LNG's commercial operations date.

Woodside completed the sell-down of a 40% interest in Louisiana LNG Infrastructure LLC to New York-based investment firm Stonepeak in June 2025. Woodside is continuing discussions with potential high-quality partners interested in acquiring equity in the project holding company Louisiana LNG LLC.

Following FID, and as Woodside continues to progress Louisiana LNG, we would like to provide potential investors with certainty around the ITEP contract language regarding the timeline to commence operations, to be fully operational and to ensure that these dates align with Woodside's post FID project timeline.

Section 4.02(A) of Exhibit A references two dates - December 31, 2023 to "commence Operation" (as defined in Exhibit A) and December 31, 2026 to become "fully Operational". Section 4.02(0) provides a three-year grace period if the project is not "fully Operational" on or before December 31, 2026. In addition, Section 6.01 (8)(1) references a three-year grace period from the date in Section 4.02(A) but does not clearly identify which of the two dates mentioned in Section 4.02(A) is applicable.

To clarify any ambiguity in application of Exhibit A, to confirm the parties' intentions and understanding of the post-FID project timeline and to clarify the operation of the Sections set out above, Woodside respectfully submits this letter as a formal request to (a) modify Section 4.02(A) of Exhibit A to reflect that Woodside intends to Commence Operation by December 31, 2029 and become Fully Operational by December 31, 2033 and (b) modify Section 6.01 (8)(1) of Exhibit A to reflect a Company Default will occur if Woodside does not Commence Operations within a 3-year period beginning on December 31, 2029. These modifications would clarify that the three-year grace period to Commence Operations starts on December 31, 2026 and extends the fully Operational grace period date by four years to December 31, 2033.

Rest assured that Woodside has proceeded and will continue to proceed with "commercially reasonable due diligence" on this Project, and we are enthusiastically anticipating the completion of this endeavor. Given this requested extension, Woodside fully expects to meet, or exceed, the Project Estimated Investment Valuation of \$15.9 billion, New Net Jobs of 6,400 and a peak Required Annual Payroll of over \$54 million contemplated in the ITEP contract.

Woodside is committed to ensuring that our \$17.5 billion dollar investment in Louisiana LNG will deliver significant economic benefits for Louisiana. An Economic Impact Study by LSU 1 has concluded that during construction the project will support 18,600 new jobs and \$1.1 billion in earnings in Louisiana. The economic activity associated with the project during construction is anticipated to support an estimated \$119.0 million per year in state and local revenues. Once operational LSU estimates the project will support 2,900 jobs and \$213 million in earnings in Louisiana and an \$22.2 million per year in state and local revenue. In Calcasieu Parish, LSU estimates that Woodside's investment will generate between \$1.0 billion and \$2.6 billion in new local tax revenues."
